OBJECTIVE — I'm looking for a position of **Software Engineer Intern** or **Junior Developer**, where I'd be able to maximize my programming skills and I'm extremely excited by the idea of developing tools for millions of people. It's also great that in order to achieve high efficiency a software engineer has to work with the latest technologies.

EDUCATION

June 2013 Bachelor's Degree in Applied Physics and Mathematics
Moscow Institute of Physics and Technologies
Bachelor's diploma is connected with Quantum Computations.
G.P.A. 3.3/4.0

June 2013 Auditor
Yandex School of Data Analysis
As an auditor I've studied algorithms(2 terms), discrete maths, C++(2 terms) and parallel and distributed computations courses.

WORK EXPERIENCE

22 March 2012 – Present: Software Engineer
Company: NetCracker
Working as a Junior Developer, creating custom code. Including lots of work with undocumented unfamiliar code. Developing business logic.

PROFESSIONAL SKILLS

- **Java** – Advanced

- **C++** – Intermediate(no experience in big projects)

- **Algorithms** – Intermediate

- **Linux** – Intermediate(desktop system, a little development experience)

- Python, SQL(Oracle dialect) – Beginner

- Telecommunications – Beginner

- openMP, MPI(openMPI), MapReduce(hadoop) – Beginner

LANGUAGES — English – Upper Intermediate (B2)
